

Meet the Apprentice

Ellis Miller

Department: Commercial Property
Apprenticeship: Business Admin

Tell me about yourself? I am a big fan of the arts, whether that is performing arts/going to plays or musicals, or painting whilst at home. Above all else I love socialising with friends and loved ones.

What made you seek an apprenticeship? I wanted to see the law sector from an employee point of view first before I dedicated myself to Uni and potentially getting a degree in a subject that I have no experience nor insight into.

What do you like about working for Jacksons? Each day the work doesn't feel like work, it feels more like problem solving as each new task brings a unique answer to solve it. Also, everyone around me from the partners to the employees are very helpful, patient, positive and inspirational, and make working at Jacksons that extra bit more enjoyable.

What is your greatest achievement at Jacksons? Thus far, my greatest achievement has been the positive feedback from my colleagues and Department Head.

What do you hope to get out of your apprenticeship? I hope to be employed at Jacksons after the completion of my apprenticeship and grow, learn, and develop within the organisation in the hope that through Jacksons I can achieve great things.

What advice would you give to potential apprentices about joining the world of work? Dedicate some time into researching and asking around regarding what the apprenticeship/work placement can do for you. Choose the course depending on convenience and, of course, your ambition and drive to work within the chosen industry. Finally, choose your course based on what you want and what you wish to achieve, and not to please other people.

Would you recommend the apprentice route to others? I would recommend the apprentice route to others.

If you could travel anywhere in the world where would you go? Florida to go to Disney Land and Universal (preferably at Halloween).

What is your favourite colour and why? Purple, because it's a union between two colours that are normally associated with being polar opposites by belief. Hot and cold, north and south pole on a magnet etc. Besides that, it is also a rather attractive colour.

If you had to choose your favourite meal what would it be? Tantanmen beef brisket ramen from Wagamama's

What luxury could you not live without? Any luxury that would allow me to communicate with those close to me and listen to music.
